### SUMMARY

I'm a web developer born and raised in Calgary with a lifelong obsession for everything coding. I love algorithms, abstract data visualization and manipulation as well as learning new concepts. I flourish in fast paced environments and work well under pressure.

### SKILLS

#### LANGUAGES

HTML/CSS/SASS, JavaScript, PostgreSQL, SQL, Ruby, TypeScript

#### FRAMEWORKS

jQuery, Express, EJS, Bootstrap, SCSS, React, Ruby on Rails, Knex, Angular

#### OTHER SKILLS

MongoDB, Version Control, Ajax, npm, rvm, Test Driven Development

### EMPLOYMENT

#### TEN FOOT HENRY

Cafe Supervisor

July 2017 to Aug. 2018

- Worked closely with owners and management to develop and strengthen the cafe's identity through social media and community involvement.
- Was responsible for training new hires up to the quality, behavioural and policy standards of the company.
- Communicated directly with management about the progress of new baristas.
- Completed inventory and management tasks for the cafe in an efficient and highly organized manner.

#### DOUBLE ZERO

Bartender

June 2015 to May 2018

- Guided a tailored customers experience for each guest while maintaining organization of the bar resources and tools.
- Served as liaison between front of house and back of house to develop cohesiveness and coherence ensuring cooperation and top quality service.
- Thrived in a high pace, high stakes environment and developed strong prioritization and time management skills.
- Was in charge of and accountable for cash handling and discounts for the entire team.

#### STARBUCKS

Supervisor

Feb. 2012 to May 2015

- Worked closely with management to handle the day to day and long term activities of a team of 20 people.
- Played an important part in implementing large and store wide campaigns guiding the team through the changes.
- Interviewed, trained and supported my team with a high awareness for each member's strengths and areas for growth.
- Fully managed and kept track of fluctuations in inventory to keep a comprehensive oversight of selling trends.
- Improved and maintained the employee experience and kept a consistent team at the location for a record breaking 13 months.

### PROJECTS

#### TAOLIST

Used: PostgreSQL, Knex, Bootstrap, Express, EJS, jQuery, Ajax and Google's Cloud Machine Learning Engine

A single page app that took user inputs and ran them through a machine language algorithm to decide what kind of input it was and then added that input to a todo list in a relevant category.

#### PROPERTY EVALUATOR

Used: React, Express, Node, CSS, PostgreSQL, jQuery, Ajax, Chart.js, Google Map Api and Open Data Calgary

Using the Google Map Api and Open Data Calgary, we built a single page web application that allows the user to search for addresses in Calgary and see the property value and population trends over the last 5 years, the crime rates of the surrounding communities, the walkability of the locations and their assessed flood risk as well as markers on a map showing where in Calgary these properties are located. A second section of the project allows the user to view a heatmap of the city that visualizes population, crime and our users interest levels within the city.

#### CHATTER

Used: React, Express, WebSockets and SASS

A client to client messaging app that uses web sockets to update the program in realtime.

#### JUNGLE

Used: Ruby, Rails, PostgreSQL, SASS, Puma, Capybara, Stripe

An online store application built with Ruby on Rails with multiple products, categories, users and an admin dashboard. The application uses stripe to process payments, has a custom built shopping cart and receipt emailer.

### EDUCATION

#### Lighthouse Labs

Full Stack Web Development Bootcamp
